ON THE BUTTON

The Mio Modero Classic comes with solid, engraved buttons, each with an LED that glows to indicate feedback when a control function is activated. When a control function is activated, the user will immediately know everything is working as it should.

OPTIONS GALORE

The Classic is available in both single and double style options supporting up to eight or sixteen solid, engraved square buttons, respectfully. Horizontally adjacent square buttons may be replaced with double-wide, rectangular, engraved buttons for ease or emphasis. Simply snap them in or pop them out to create the perfect interface for any application.

COLOR CHOICES

The Classic is available in a choice of three colors – black, white and beige. All three complement the award-winning Modero Touch Panel line and will work in any application.
