

No two presentations are the same. Unfortunately, neither are presentation devices.

Laptops, tablets and phones all feature different connection formats, and the variety can wreak havoc on your meeting room. Adapters often get lost or forgotten, leaving you with an incompatible connection, a late meeting or a botched presentation.

TechLogix Share-Me™ Presenter Cables ensure you always have the right adapter on hand. A secure ring locks your adapters directly onto an HDMI cable, ensuring they stay put and your meetings start on time.

Forget lost adapters with TechLogix Share-Me™ Presenter Cables.

Share-Me™ Presenter Cable Options.

TechLogix Share-Me™ Presenter Cables are available in eleven different stock configurations. Custom configurations are available upon request.
